DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claim 1 is allowed.
3. The following is an examiner's statement of reasons for allowance: Belik et al. (U.S. Patent No. 4,469,369) shows a vehicle (see in particular Fig. 7) having front steered axles, first and second engines and transmissions for driving first and second drive axles, but Belik et al. fails to show the first engine being provided at the front portion of the vehicle or the second engine necessarily provided on an upper side of the second transmission. Igarashi (U.S. Patent No. 4,368,793) discloses a vehicle having first and second engines and transmissions, but fails to teach first and second drive axles distinct from the front axles as claimed, and also does not teach the first drive axle being provided at a middle portion of the vehicle. The prior art, either alone or in combination, neither anticipates nor makes obvious a vehicle having all elements as claimed, including three sets of axles respectively provided at the front, middle, and rear of the vehicle, two engine and transmissions, and specifically wherein the first engine is positioned at the front portion of the vehicle and the second engine is positioned at the rear portion of the vehicle on an upper side of the second drive axle and to the rear of the second transmission. The above recitation, combined with the rest of the structure in the independent claim, clearly defines over the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chene et al. (U.S. Patent No. 6,138,783), Gorrell et al. (U.S. Patent No. 4,090,415), Word (U.S. Patent No. 4,664,446), Campbell (U.S. Patent No. 4,142,600), and Matsukata (U.S. Patent No. 3,502,165) disclose vehicles having multiple engines and/or drive axle assemblies.
